**NATIONAL WORKSHOP  
ON  
Leveraging Technologies  
Using  
*ERP and Open Source Technology*  
(LTEOST)  
25<sup>th</sup> March, 2011**

**Prelude**

Enterprise Resource Planning is needed to integrate the resources and processes of any organization, whereas software development using open source technologies is the demand of current era to keep the costs involved in system development and maintenance at minimum levels. *LTEOST* covers both of these prime areas. *LTEOST* focuses on ERP solutions and use of open source technologies for academic institutes and universities. Therefore, speakers will highlight the benefits of ERP solutions and use of open source technologies for academic institutes and universities with demonstrating practical examples and case studies. All presenters will describe original work, not previously presented at other workshops. Best practices based examples, case studies, research reports and work-in-progress reports will be presented.

***Objectives***

The purpose of the “Leveraging Technologies *Using ERP and Open Source Technology (LTEOST)*” is to bring together academicians, researchers, engineers and practitioners interested in the technological advances and institutional applications of *ERP, Open Source Technologies and other areas related to academia*. The workshop intends to bridge the gap between different areas of *ERP, Open Source Technologies and other key areas for different institutes and universities*. The workshop will feature Best practices based examples, case studies, research reports and work-in-progress reports in the areas of *ERP, Open Source Technologies and other areas related* for academic institutes and universities.

## For Whom

*ERP and Open Source Technologies* are the future of technological advancements worldwide. This workshop provides an excellent platform for academicians, researchers, practitioners and corporate houses to let their professionals interact with experts in this field of web and knowledge based information systems to build knowledge base, develop skills and get personalized help on their *ERP, Open Source Technologies and other areas related to academia*. The workshop is designed for engineers, MNCs, Indian Corporate, PSUs, non-profit organizations, professionals from NGOs, Academicians, Research Scholars and Computer Science/IT Students, The participants would be given a certificate of participation by the Institute.

## Key Topics:

- ERP Solutions for academia
- Open source technologies for academia
- Social Networking and Blogging
- Online Examinations
- Video Conferencing and Web Casting
- Content Management System
- Web Administration
- Other related issues with institutional integration at various levels
