**Day** : **Tuesday**  
**FACULTY INCHARGE** : **ASHIMA SINGH GUREJA**  
**CRC INCHARGE** : **MR.S.P.DAHIYA**

## OBJECTIVE:

Since it was a part of our curriculum we see all the things which were related to our syllabus. The application of our subject proved to be futile through our trip. Our basic objective was seeing the practical aspect of our subject and we experience many good thing to that extent. Seeing all working of the entire channel was an experience of a life time.

## REPORT OF THE VISIT:

### Edifying excursion to Lok Sabha

To enhance our learning skills and our technical knowledge we the students of Tecnia Institute of Advanced Studies went on an educational trip to channel Lok Sabha on 19<sup>th</sup> October 2010. This was very appreciable, knowledgeable and erudite and will be definitely helping for our future prospective.

Being the channel very known and prudent, the trip was organized at its very best. In the channel we observed various things which are definitely going to involve us in our future education. We actually got assistance from Mr Dhawal who was an employee in Lok Sabha and he explained the things very well. Infact they also discussed about the channel in direct contact with the students and told how this channel is seating apart from the other channels. The channel was very wise and the technical ability was unto the mark.

In the channel we saw many things like studio floors, VCR rooms, General News Room, Main VCR room, HDMI VCR room, MCR room and many other things which we can visually see in books but it was an experience while seeing those things in reality. The use technology was extremely at the peak because they use the equipments like robotic cameras and HDMI studios which is one of its kinds in India.

The trip actually was very well organized with the cooperation of our faculty members who guide us in the entire trip.

## Learning Outcome:-

Learning outcome was extremely wise; we got to see the other side of the film productions. The placement of cameras in studio, studio floors placement, lighting techniques, various sound devices, and VCR rooms, use of audio mixtures and application of various other equipment really enhanced our knowledge. The best part was the experiencing the HDMI lab and the HDMI studio which is one of its kind in India. The major thing was actually seeing the application of Robotic Cameras, Digital audio mixers and many sound types of equipment.
