ABOUT TECNIA ⟫

Tecnia Institute of Advanced Studies (TIAS); with you all. Almost 2 decades ago, our Organization made its humble beginning.

GIVE YOURSELF THE EDGE OF EXCELLENCE THROUGH TECNIA

Today, our students and scholars are spread across the globe as IAS, IPS, MNCs, Technocrats, Media Persons and their contribution makes a difference everywhere.

Tecnia Institute of Advanced Studies (TIAS), one of the Premier Institiue is NAAC Accredited "A" Grade Institute duly Approved by All India Council for Technical Education, Ministry of HRD, Govt. of India and is affiliated to Guru Gobind Singh Indraprastha University, Delhi; Recognized under Section 2(f) of UGC Act, 1956 established in the country's capital in the year 1998 as an educational and professional center, with an aim to provide technical knowledge required for career development of young generation by way of providing the quality education. Tecnia Institute of Advanced Studies (TIAS) - is ISO 9001:2015 & ISO 14001:2015 certified institute for its Quality Management system (QMS), Environmental Management system (EMS), for its well established system and procedures for imparting quality education in MBA, MCA, BBA & BA(J&MC) Program.

ABOUT CONFERENCE ⟫

In India Higher education has expanded in a remarkable way. It is a dynamic and continually evolving sector that keeps adapting itself to recent changes. Quality is the back bone of any education system. There are only a few Indian Higher Education Institutions on the Global Education Map which have earned a reputation for high quality services as per International quality parameters. There is a need for all the stakeholders of higher education to come together to ensure quality education, skill development and enhanced employment opportunities for the aspiring young generation of students. The Government of India has undertaken several policy measures to infuse quality in the overall education system. The Graded Autonomy to Universities confers them freedom to hire international faculty, enroll foreign students, enter into academic collaborations and run regular, distance and online learning programmes. Numerous commissions viz. National Institutional Ranking Framework (NIRF), National Assessment and Accreditation Council (NAAC) and National Board of Accreditation (NBA) have designed ranking and rating methods for accrediting programs as well as Institutions/ Universities for enhancing global quality standards in education. The compliance with specific norms is mandatory for all i.e. autonomous universities, deemed universities and other institutions for quality sustenance. The culture of research and innovation is being cultivated by various statutory bodies through provisions made for research project grants and boosting consultancy. Introduction of 'Smart India Hackathon' and the 'Innovation Cell' by AICTE are few steps in this direction. A specific National Policy on Skill Development launched by the Government of India also aims at honing the pragmatic knowledge and skills of the students to grab better employment opportunities in today's competitive corporate world. Quality Enhancement in Higher Educational Institutions is an unending journey towards excellence.

However, it may be pertinent to understand various hurdles faced by the institutions. Short-term approvals are granted to the institutes by numerous regulatory bodies like AICTE, UGC and State Governments; and in this process even well-established Institutions end up in unnecessary loss of productive hours due to extensive documentation. Non-revision of fee structures in tune with inflationary factors and the competitive educational quality requirements are the major deterrents for future planning and the progress of institutions. However, the perception that an educational institution should be a non-profit making organization does not result in internal generation of funds by the institution for its continuous development, improvement and up gradation.

As a result, the institutions are susceptible to various problems like shortage of quality faculty, inadequate infrastructure, insignificant research work, limited corporate-academia exposures and linkage etc. All this creates a mismatch between industry expectations and the quality of graduating students. Addressing these issues can only be made possible when there is change in perception of all stakeholders and the regulatory authorities function more as facilitators rather than mere regulators, allowing the institutions to progress freely and gracefully

OBJECTIVES OF THE CONFERENCE ⟫

- To appraise the present education system in India and understand the challenges faced by Higher Education.
- To analyze the role of regulatory bodies.
- To disseminate the best practices of Higher Education Institutions prevalent in India.
- To explore strategies for achieving educational excellence in Higher Education

CONFERENCE PROCEEDINGS ⟫

The blind reviews conference papers will be published in the conference proceedings (full paper) bearing an International Standard Book Number (ISBN).
