**- Ashima Sharma & Dr. Vipul Partap**

## Industrial Visit & Educational Tour

An Industrial Visit & Educational Tour to Advik Hi-Tech Pvt. Ltd, Ashirwad Talcum powder Candle factory & Historical places of Nanital & Jim Corbett of four-days and three nights was organized by Tecnia Institute of Advanced studies. Students of all the programs participated in this tour. Dr. Namita Mishra, Mr. Mohit Tiwari & Mr. Pradeep Kumar Palei accompanied the students to guide them.

The main objectives of this tour were to correlate theoretical knowledge with real time practice of the companies; to bridge the gap between the theory and actual practices; to enhance the knowledge of practical photography of BJ (MC) students.

The students visited the Eco Cave Garden which is Located in Sukhtal. A network of inter-connected rocky caves and hanging gardens, The Eco cave garden is one kilometre away from the Mall Road. Then the students were taken to the famous candle factory of Nanital where they learned about the procedure of the candle making and selling them in the other cities.

Students enjoyed Boating at Naini Lake which is situated in the heart of the city. The eye-shaped lake is a tourist hotspot and acts as a magnet for all those visiting the hill resort. Here, a person can either

Student of TIAS at Ashirwad Talcum powder

Students visiting candle factory

take a leisurely stroll or indulge in boating and enjoy the surrounding beauty and also went to the Asia's second highest Zoo. All students enjoyed a lot with pure fun.

Students Visited, "ADVIK Hi-Tech Private Limited (AHPL)" which is one of India's leading & Global automotive components manufacturers. The students were given presentation on the company's profile and operation by the managers of different sections of the company. Students also visited "Ashirwad Industries" a leading manufacturer of soap and Talcum Powder located in Kashipur, Distt. Udham Singh Nagar, Uttarakhand (India) and is founded in 2001. On the last day of the tour the students enjoyed Jungle jeep safari to Jim Corbett.

This visit provides hands on practical exposure to the students for making their professional career in Business Management and Media industry. Students learn different processes of small scale industry. They come to know about the actual processing of production of Automobile Industry. BJ(MC) students gets the exposure for capturing the historical places and real life coverage of historical monuments.

**Lessons from suffering**

The matrix of life has many more puzzles than one can realize. If we approach the illusion of suffering and conflict with a playful insight, it would be far easier to transcend moral dilemmas and understand the whys and why-nots, even if momentarily. Both good and bad times bare the nuances of life lived, events experienced and decisions made. While happy expressions remind us of God's benevolence and grace, tough interludes lend a revelatory meaning to all that is positive and pleasant and veers our inclinations towards better ends, more productive actions to be fruitful in the long run.

In the words of Khalil Gibran, "Out of suffering have emerged the strongest souls; the most massive souls are seared with scars. Suffering teaches empathy, tolerance and patience. It yields benefits when taken in the right spirit. People suffer all over the world in one way or the other. It's only a matter of time before people face problems, which if left by itself become larger with time. Whether natural or unnatural, the cause often has very little to do with the painful effects that impact the individual irreversibly.

Like making a list of all the splendid gifts bestowed on us, including health, family

**Reason out anger**

Whenever we think of our flaws, anger is the last thing that comes to our mind; but it is a serious issue with everyone today. Everyone thinks that he/she has the right to be angry. It is very easy to listen to rules; count to ten, go out of the room, focus on positive things but in reality, when

you are itching to reply back, when retorts are struggling to come out, then it's very difficult to remember the rules and follow them.

I have been in this situation countless times; and I can safely say that most of us rationalize that the other person is provoking us. We all seek refuge in saying that "I was not going to say anything but he left me with no choice." We think ourselves to be rational while doing and saying the most irrational things ever.

I can control whether to reply or remain silent. It's my prerogative but yes, to exercise this control is the hardest thing. The sweet taste of victorious pride is hard to let go. The desire to revenge our wounded pride is irresistible and this is the very desire which creates friction between friends, destroys families and sometimes causes some people to commit unspeakable acts of crimes. And all the while, the secret to avoid all this lies

**This Month**

**February 2, 1848** - The war between the U.S. and Mexico ended with the signing of the Treaty of Guadalupe Hidalgo. In exchange for \$15 million, the U.S. acquired the areas encompassing parts or all of present day California, Nevada, Utah, Arizona, New Mexico, Colorado, Wyoming, and Texas. The treaty was ratified on March 10, 1848.

\*\*\*\*\*

**February 4, 1861** - Apache Chief Cochise was arrested in Arizona by the U.S. Army for raiding a ranch. Cochise then escaped and declared war, beginning the period known as the Apache Wars, which lasted 25 years.

\*\*\*\*\*

**February 3, 1865** - A four-hour peace conference occurred between President Abraham Lincoln and Confederate Vice President Alexander Stephens at Hampton Roads, Virginia. The meeting was unsuccessful as President Lincoln insisted there could be no armistice until the Confederates acknowledged Federal authority. The Confederates wanted an armistice first. Thus the Civil War continued.

\*\*\*\*\*

**February 3, 1870** - The 15th Amendment to the U.S. Constitution was ratified, guaranteeing the right of citizens to vote, regardless of race, color, or previous condition of servitude.

**Anger Management**

and money, it becomes imperative for us to explore our own limitations, weaknesses and faults. That coupled with the ellipses in behavior ours and that of others across various situations enables deeper introspection and self-correction.

By being attached and detached at the same time, we can enhance our understanding of the ironies and confounding intensities in our lives. Whether it is struggle for freedom, survival or overcoming fear, we must not forget that what matters is that we learn from such reflections of adversity; and therein lies true victory. The day we realize this 'truth', we are on the way to be better human beings because that is one of the ways of the art of living.

within our heart. As for me, when I feel getting myself worked up over anyone, I start reasoning and let the other person know my side of the story. I tend to shout less and listen more. I fail most of times but I carry on; victory is coming at least, even if in short bursts and spurts. Most often than not, we regret our words whenever spoken in haste but this repentance comes very late. Sometimes we don't even get the opportunity to apologies. If we can just listen to our inner voice whenever we are angry, we will not just save others from being hurt, we can save ourselves too from the inferno of rage and destruction.

- Honey Shah

**Basics of Media**

**Bias Current:** An extremely highfrequency AC current, far beyond audibility, added during a tape recording to linearize the magnetic information.

\*\*\*\*\*

**Bidirectional Microphone:** A microphone that picks up sound to its front and back and has minimal pickup at its sides.

\*\*\*\*\*

**Binaural Hearing:** Hearing with two ears attached to and separated by the head.

\*\*\*\*\*

**Binaural Microphone Head:** Two omnidirectional capacitor microphones set into the ear cavities of an artificial head, complete with pinnas. This arrangement preserves binaural localization cues during recording and reproduces sound as humans hear it, threedimensionally. Also called *artificial head* or *dummy head stereo*.

\*\*\*\*\*

**Blocking:** Plotting performer, camera, and microphone placements and movements in a production.

\*\*\*\*\*

**Board:** Audio mixing console.

\*\*\*\*\*

## 22% Indians in Britain's ultra-rich club

Super-rich Indians account for more than 20% of the wealth of Ultra-High Net Worth (UHNW) individuals in Britain, a new list showed on Tuesday. As a national group, they are second only to expat Russians. The list, published by the Singapore-based Wealth-X group, places steel magnate and Arcelor Mittal Chairman Lakshmi Mittal at second place with a fortune of \$15.8 billion. Mittal was pushed to the second spot this year by Russian Alisher Burkhanovich Usmanov, who is part owner of the English football club Arsenal and is worth \$16.4 billion.

"Mittal has seen his net worth estimate decline along with the stock price of Arcelor Mittal, losing at least \$30 billion in recent years," the report said. The two other Indians on the

top 15 list are the Hinduja brothers Srichand at number 9 with a net worth of \$7.6 billion and Gopichand at 12th with \$6 billion.

Taken together, the wealth of the three Indian-origin industrialists makes up 22% of the top 15 total of \$133.3 billion.

Apart from Usmanov, the two other Russians in the list include Roman Abramovich (at number 3, \$12.1 billion) and Leonard Blavatnik (Number 5, \$9.5

billion).

According to Wealth-X estimates, there are 10,760 individuals residents in Britain worth \$30 million or more, with at least 310 new individuals joining the ranks of the ultra wealthy. On an average, Britain has added one UHNW individual every day since 2011. The combined wealth of the UHNW in Britain stands at an estimated \$1.3 trillion.

"The wealth composition of the United Kingdom, London in particular, is diverse," said David Lincoln, Director of Research at Wealthin our data showing that 31% of the UHNW population in the United Kingdom is considered non-domiciled, with non-resident Indians and West Asian UHNWIs making up a significant proportion of these."

## Plants behave like animals: A study

Some plants like the humble corn display altruistic behavior just like animals said scientists. The study led by the University of Colorado Boulder looked at corn, in which each fertilized seed contained two "siblings" -

an embryo and a corresponding bit of tissue known as endosperm that feeds the embryo as the seed grows.

They compared the growth and behavior of the embryos and endosperm in seeds sharing the same mother and father with the growth and behavior of embryos and endosperm that had genetically different parents.

"The results indicated embryos with the same mother and father as the endosperm in their seed weighed significantly more than embryos with the same mother but a different father," said Professor Pamela Diggle, a faculty member in CU-Boulder's ecology and evolutionary biology department.
