*Mr. Kanwaljit Singh explained the benefits of mutual funds*

The most important benefit of investing in a Mutual Fund is that the investor can redeem the units at any point in time. Unlike Fixed Deposits, Mutual Funds have flexible withdrawal but factors like the pre-exit penalty and exit load should be taken into consideration. Among other benefits of Mutual Funds the most important benefit is its flexible nature. Investors need not put in a huge amount of money to invest in a Mutual Fund. Investment can be as per the cash flow position.

Mutual Funds are easily accessible and you can start investing and buy mutual funds from anywhere in the world. An asset management companies (AMC) offers the funds and distributes through channels like :

- Brokerage Firms
- Registrars like Karvy and CAMS
- AMC'S Themselves
- Online Mutual Fund Investment Platforms
- Agents and Banks

In a Mutual Fund, funds are collected from many investors, and then the same is used to purchase securities. These funds are however invested in assets which therefore helps one save on transaction and other costs as compared to a single transaction. The savings are passed on to the investors as lower costs of investing in Mutual Funds.
