REPORT

Event	Webinar
Theme	Why IP is important in academia?
Date	26 th April ' 2021
Time	3:00 pm – 4:00 pm
Venue	Virtual (YouTube Live Platform)
Dean	Dr. Rashmi Gujrati
Convener	Inderpreet Singh
Resource Person	Dr. Abhay Jere Chief Innovation Officer MoE Innovation Cell Dr. Mohit Gambhir Innovation Director MoE Innovation Cell

Objectives

1. To make the participants understand the importance of IP in everyday life.
2. To enhance the knowledge and encourage the youth to know more about IP and get involved in technology.
3. To make the participants understand about the need of IP these days and help them understand the essence of technology in education sector.
4. To make the participants aware about the IP rights and protecting data and keeping it safe.

WEBINAR

This webinar was intended to train participants with the different opportunities of IP sector in India and the importance of being in touch with technology. The key focal point of the workshop was to identify the use and scope of IP in academics and how to keep your data protected and be aware about the rights that come with use of IP.

The participants have learnt about how IP is advantageous to every sector. In workshop complete online guidance was given by resource person. Workshop has enabled them to analyze and interpret the importance and use of IP in academics and other specific areas.

RESOURCE PERSON

DR. ABHAY JERE

Chief Innovation Officer

MoE Innovation Cell

- Mr. Jere started with introducing us to the basic definition Intellectual Property. He further added what IP is all about and history of IP.
- He informed us about how IP is developing each day and helping different sectors grow and become efficient enough.
- He told us how important it is for academic scientists to gain greater awareness and knowledge of the various issues involved with IP resulting from their research and inventions.
- He briefed us about how we require IP in our academics for management of data.

- He added about how we can develop our skills through IP and use it to add into our growth and knowledge.
- He further briefed about IP and its connection to various sectors like teaching, Research and its related right.

DR. MOHIT GAMBHIR

Innovation Director

MoE Innovation Cell

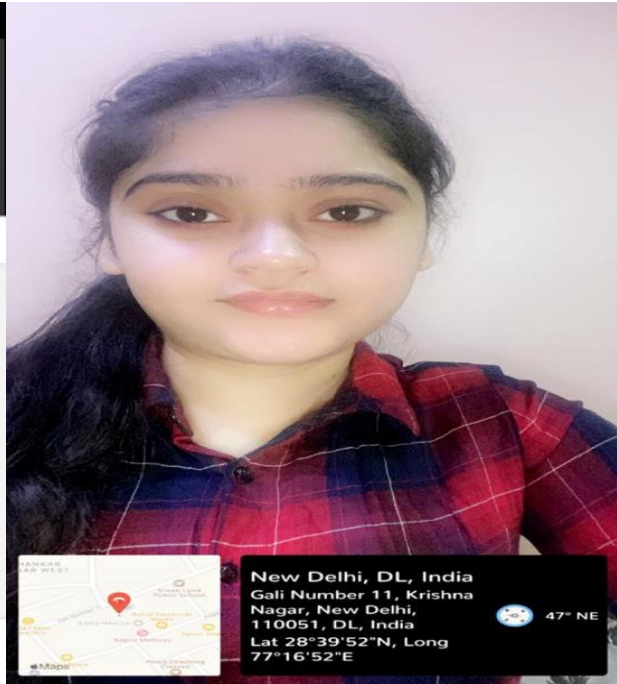

- Mr. Gambhir took over after Mr. Jere to explain various sectors IP helps
- He added that how IP is helps in research and development of student like R&D, universities and PRIs produce results in the form of inventions, scholarly publications, databases, new plant varieties, confidential information, computer programs, etc.
- He told us about online classes have been benefited in pandemic through IP and how further IP will be benefiting the Teaching sector
- He briefed us about IP policies in teaching sector which deals with:
 - ❖ ownership of and right to use the IP;
 - ❖ procedures for identification, evaluation, protection and management of IP
 - ❖ procedures for cooperation with third parties;
 - ❖ guidelines on the sharing of profits from successful exploitation; and
 - ❖ Mechanisms to ensure respect for third-party IP rights.
- He told us about an effective IP policy:
 - ❖ provide legal certainty;
 - ❖ nurture an environment that supports and encourages innovation and development;
 - ❖ encourage researchers to consider the possible opportunities for exploiting an invention so as to increase the potential flow of benefits to society;
 - ❖ facilitate the creation of public-private partnerships to support economic development;
 - ❖ encourage mutually beneficial relationships with other institutions;
 - ❖ balance the various conflicting interests of the university, industry and society; and
 - ❖ Ensure compliance with applicable national laws and regulations.

IP and Teaching

In addition, an academic institution's teaching activities will also generate IP, such as:

- print publications
- theses
- software
- music
- sound recordings
- teacher presentations and intraneta works

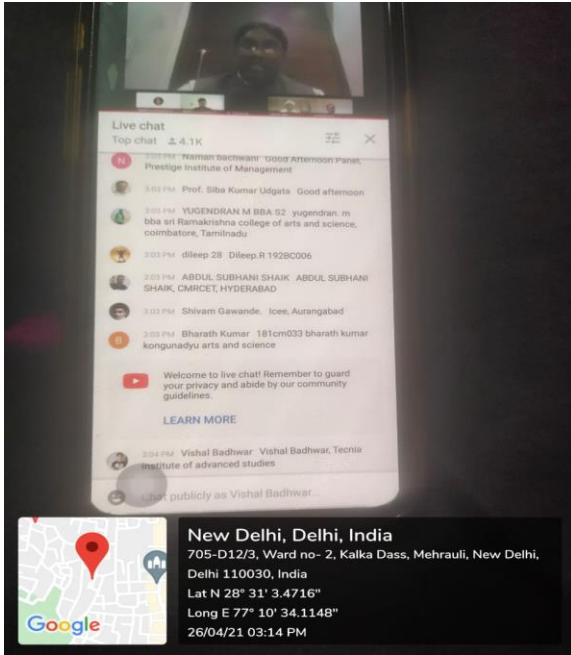

These are generally protected by copyright. This content and modern technologies have fostered greater access to scholarly materials, but also prompted scholars' concerns over their ownership and use. Our University institutions need suitable IP policies to deal with the ownership and management of teaching materials, access to scholarly information and use of third-party materials.

INTRODUCTION

- The world economy is changing- We are in the "information age".
- Conception of what amount to property has significantly changed-we are no longer restricting the meaning of property to tangibles.
- In the knowledge based economy, the dictates of the day are the "ideas and concepts".

India's Research and Innovation output

Number of Patents:
 World Intellectual Property Organization (WIPO) 2018 report.
 China: 14,00,661 patent applications
 USA: 6,21,453
 India: 53,627 approximately 68% were made by non-residents.

Number of Publications:
 2018 compilation of Science and Engineering Indicators U.S. National Science Foundation
 USA (17.8%) and China (18.6%) published approximately four times as many articles as India in 2016.

Quality of Research:
 Total number of Publications India stands at the 5th position.
 Publications in top 10 journals: USA: 15.8%, China: 27.6%, India: 36.2%.

Role of IP in Academia

Intellectual property (IP) plays an essential role in both the research and teaching functions of Universities or academic institutions. This includes IP created by Universities/institutions and also that copy IP that whether it be basic or applied research, through their R&D activities, Universities/institutions produce results in the form of inventions, scholarly publications, databases, new data varieties, confidential information, computer programs, etc. Many of these are unobtainable by others unless they are made public through the patent or laboratory-visit privileges which require further R&D before they can be commercialized.

By granting Universities/institutions the rights to their own IP derived from publicly-financed research, and allowing them to commercialize their results, governments around the world are trying to increase the commercialization of inventions into industrial processes and products, and to strengthen collaborative ties between universities and industry.

Learning outcome

1. Participants have learnt more about how the technology sector and its input to the society.
2. Participants also understand about the ways IP affects our lives and is helping us grow in different sectors around the globe
3. Participants learnt about various ways of getting in touch with IP sector and make it a profession where you can learn and enhance your skills in future
4. Participants also got briefed upon how the IP helps us improve our academics and make us learn different ways to get skilled.
5. Participants acquired knowledge about IP rights and the need to protect them.
