Earth Day

Earth Day has been observed on April 22 every year since 1970, when it began as a student movement on US college campuses. Over the decades, as awareness about man-made environmental degradation grew, the movement gained momentum both within and outside the US. The Earth Day celebration has a different theme every year—ranging from conserving water to making cities greener, planting trees, and spreading environmental and climate literacy. Earth Day 2018's theme is 'End Plastic Pollution'. Plastic is one of the most persistent problems of our times—it is in the oceans, landfills, and even the water we drink.

Objectives:

- To make the peoples aware about the harmful effects of plastic on the environment.
- To discuss all the issues and implement new technologies for waste management.
- To aware citizens about their duty towards the environment well being.

Report of Celebration of Earth Day:

Tecnia Institute of Advanced Studies (Eco Club) organized a Visit on 20th April 2018 to Mahatma Gandhi Institute of Combating Climate Change, Alipur, Delhi for TIAS Eco Club students on the occasion of Earth day with the above objectives.

As we reached the Mahatma Gandhi Institute of Combating Climate Change,Alipur,Delhi at 09:15 am, we were accompanied by Ms.Jyoti for registration of "An Exhibition and Expert Lecture on Waste Management". After registration we went to the Seminar Hall where she gave a brief presentation about the Earth day, after that Chief Guest of the event Dr.Chetna, Scientist, Department of Environment addressed the gathering and spoke about the history of celebrating earth day and what are the current challenges that need to be tackle by residents of earth.

Students demonstrating their posters

After his speech, Students displayed their posters to the panel of judges which was based on the theme 'End Plastic Pollution'. Then **Dr R.Palakurthy** gave detailed presentation on waste management. He explained the various technologies that can be used to prevent the ill effects of using plastic in our day to day life.

Panel of Experts

On a whole, it was an exemplary learning experience that the students will savor for a long time to come. At the end, certificate distributed to all the participants of the workshop.

Learning Outcomes:-

- Developed awareness about the ill effects of using plastic on human beings and wildlife.
- Developed awareness about the major issues and implement new technologies for the waste management.
- People aware about their duty and responsibility towards healthy and safe environment.
