**Report: Description in (min 250 to max 800 words)\***

Electronic waste, or e-waste, is a term for electronic products that have become unwanted, non-working or obsolete, and have essentially reached the end of their useful life. Because technology advances at

	<p>such a high rate, many electronic devices become “trash” after a few short years of use. In fact, whole categories of old electronic items contribute to e-waste such as VCRs being replaced by DVD players, and DVD players are replaced by Blu-ray players. E-waste is created from anything electronic: computers, TVs, monitors, cell phones, PDAs, VCRs, CD players, fax machines, printers, etc. To fight with these problems and spreading awareness about the same, Tecnia Eco club spearheads the campaign on “E-Waste” in association with Karo Sambhav under Ministry of Electronics and IT and supported by Ministry of Environment (MoEFCC) on 12.03.19 at 10 am in Multi-purpose hall, P.G. Building, TIAS and sensitize the issue of E- Waste. Mr. Mukund from Ministry of Environment &amp; IT address the gathering stating the impact of e-waste on environment and suggested effective strategies to develop a responsible e-waste management.</p> <p>The event concluded with the votes of Thanks by Mr. Anuranjan Misra, Head- Student Welfare.</p> <p><b>Later on, Eco Club Team visited to various departments to sensitize the issue of E- Waste and discussed the measures to overcome the same.</b></p>
