Version –Web Centric EJB Version

Year of Automation – 2010

Library is automated using Integrated Library Management System (ILMS) deployed with LIBSYS 10.0 which caters to needs of library automation, improving the efficiency and providing a delightful library experience using technological interventions i.e., **LSEase Software** fully automated **Web Centric EJB Version** working since 2008; with features available i.e.

1. Accession – of Books data

    A blank-book in which the titles of the books or volumes received by a library are entered in the order of their receipt, with all the necessary details regarding them, such as date of entry, accession-number, class-number, author, name of publisher, place and date of publication, size, number of pages, etc.

2. Barcodes - Generate barcodes for books

    A barcode machine-readable code in the form of numbers and a pattern of parallel lines of varying widths, printed on a commodity and used especially for stock control." They can easily be scanned with the library number.

3. Serials - Subscribed Journals entry

    A general term describing publications such as magazines, newspapers, journals, annuals and periodicals. The library's serial holdings are listed in the Catalogue. Annuals have classification numbers the others do not.

4. Membership – Users data interface for circulation

    Membership of a college library is very important so that users can use the library properly.

5. Circulation – Issue (check in) & Return (check out)

It has meticulously selected stock of books covering all possible aspects of interests including Management, Journalism, Marketing, Finance, Human Resources, Economics, Business Strategies, Operations Mgt, Information Technology and Mass Communication.
