The Eco- Club have played an important role in the Anti – Fire Campaign and the students make people aware about the hazardous effects of bursting crackers on Diwali. Air Pollution affects overall health of an individual. The pollution increase manifold due to bursting of crackers. The adverse effect of bursting cracker seems unending. Even the frequent exposure to loud noises during

	<p>pregnancy may affect the mother’s womb as well.</p> <p>Crackers often contain elements like copper, cadmium, Sulfur to produce vibrant colours once ignited. The harmful gases produced from the bursting of crackers, such as Nitrous Oxide, remains in the air for a long time if the city doesn't get enough rain or strong winds. Inhaling the fumes emitted by firecrackers increase the chances of asthma attack among patients. Heart patients and patients of chronic bronchitis and low immune system are at high risk too. The event disseminated information about the harmful effects of bursting fire crackers & also created awareness about the poor working conditions faced by the workers in the units manufacturing fire crackers.</p> <p>The drive started at around 10:30 am. Students first went to Rohini court and apprised its lawyers about importance of banning fire crackers. The students also apprised the local people nearby. They also prepared beautiful posters and banners highlighting the topic.</p> <p>Later they went to DDA office, Rohini and spoke about the topic to the officers and locals there. Overall, the drive was a great success. The students were able to aware and encourage many people to stop burning fire crackers and protect the environment.</p> <p>Diwali is a festival of lights not crackers. The student beneficiaries spread the message among people that they must rejoice together rather than wasting time and money on crackers. The student beneficiaries also spread the message of switching over to organic Rangoli on Diwali by using flowers, petals, rice and pulses instead of chemicals or synthetic colours.</p>
