REPORT

With Reference to communication received from an environmental film festival, "Quotes from the Earth" organized by Toxics Link, in collaboration with India International Centre. Dated 1 & 2 Dec, 2022 request to participate in Environmental film festival "

Eco club in college will empower students to participate and take up meaningful environmental activities and projects. Eco club's three main themes are People, Nature and culture. For the same we visited C.D. Deshmukh Auditorium, Toxics Link and India International center. It was good day as they all welcomed us so nicely.

They also arranged so many cultural activities to save our environment and river Ganga. Firstly as we entered to the auditorium some girls prepared a beautiful dance for Goddess Sara Swati, then a group song by 19 small kids, after this some of the kids prepared a beautiful act with dance for our environment and for River Ganga.

After all these cultural activities we had a tea break. There is a very good service for providing breakfast to all of us present. They provided sandwich, tea, coffee, sweets according to need. After 1 hour break, after 1 hour break we were back to auditorium for some short films regarding environment and how to clean our environment.

Then there was a short discussion round in google meet with different knowledgeable personalities. Then again those short films start and taught us about how we pollute our environment by plastic, vehicles and others. it was a knowledgeable day with so many positive thoughts for our environment and our surroundings and with this that session ends.
