2010-2013 is one of the most memorable and learning years of my life. Working in studios for hours, sitting in computer labs, sitting in content and making scripts. I am really grateful to my faculty who have supported me. It is due to that learning, I am working as a PR Executive and handling many clients. The things which we hated the most in our college were the "Forms" which we were asked to wear, but now I realize that in our professional life, it was important for us to learn how to present ourselves gracefully in front of others to leave a long lasting impact.

"Every goodbye makes us realize the importance of what we are losing." The past two years of my life were not just full of hard work, but they were undoubtedly full of such lessons and experiences which made me a better person day by day. TIAS is a fabulous institute to groom the overall personality of a student both soft skill and hard skills-wise. Here, you not only acquire knowledge in different domains but also get a lot of opportunities to learn from people in the industry through the international and National Conferences organized every year or through extra-curricular activities.

When it comes to placement part the corporate resource centre gives excellent summer internship and placement assistance to every student and organizes various programs for them such as soft skills training, guest lectures, etc to help them grow both personally and professionally. Tecnia taught me how to be ahead of others while giving respect to all and working along with them in team.
