Climate is NOT changing!!!

It has changed. There are only around 5 years remaining for 1.5 Å°C Global Warming. Around 80-85% of energy is coming from carbon based sources like Coal, Oil and Gas. The consumption of more carbon based fuels for our energy needs leads to more carbon (CO₂) emissions into the atmosphere. We tend to misuse, over-use and inefficiently-use energy and contribute more to Climate Change.

AICTE in collaboration with Energy Swaraj Foundation have launched **Energy Literacy Training (ELT)**. In this training one learns about energy generation, consumption and its impact on the environment. Students can also learn how to reduce your energy needs and how one can switch to solar energy 100%.

This free of cost, self-paced, powerful and short training consists of 12 modules of about 15 minutes each in the form of videos and can be done easily within 3 to 4 hours. On successful completion of training, students will get a **Certificate of Energy Literacy Training** with the logo of AICTE and your institution.

We invite all AICTE affiliated colleges/institutes to register for Energy Literacy Training. Please make your institute 100% Energy Literate till 31st October and win rewards*.

Take your first step towards Climate Correction.
