**Report: Description in (min 250 to max 800 words)\***

Report of the Session: Research is the methodical, unbiased process of obtaining, logging, and analysing data in order to make appropriate and significant conclusions. It suggests thorough inquiry and a commitment to science, where the researcher examines the facts more carefully in order to learn everything that can be learned about the topic at hand. Management decision-making is facilitated and uncertainty is decreased by applied research. One needs to be well-versed in the most recent advancements in research methods to keep up with recent advancements in any area. The Workshop on Research Methodology & Data Analysis will explore the fundamental aspects of research and the consequent need for participants to rethink the assumptions that underlie historical paradigms of research in the field of management while keeping in mind the significance of research methodology. The goal of the course is to give participants a practical way to do research.

Participants are likely to leave the workshop with the knowledge and abilities needed to examine the literature, formulate hypotheses, frame research designs, recognise sample procedures, and understand the function and significance of data gathering and analysis tools. The participants will be exposed to some brief theoretical and practical inputs during the seven-day session. The participants are required to bring their research problem and data if they need to work on them during the workshop. At the conclusion, they will do independent data analysis and present their findings to the class. Objective of the Session:

- To provide an overview of Contemporary Research Methodology & Review of Literature.
- To provide the platform for discussion on the methodological requirements of research and to simulate & capture new approaches.
- To enable researchers, irrespective of their discipline, in developing the most appropriate methodology for their research studies.
- To make them familiar with the art of using different research methods and techniques.
- To provide the platform for discussion on the statistical requirements of the research.
- To train and inculcate the skills for Data Analytics.
- To guide participants for Publishable Technical Writings (including Research Ethics)
