REPORT

On the 27th of October 2023, the talented students of the GrafixX Club at Tecnia Institute of Advanced Studies came together to make a poster with a poignant message - "Save Water Save Lives" This performance was not just an art endeavor but also a powerful means of addressing a wasting a water issues.

Save water is the water conservation for solving the problems of water scarcity in the future. In many regions of the India and other countries there is much shortage of water and people have to go for long distance to get drinking and cooking water to fulfil daily routine. On the other hand, people are wasting more water than their daily need in the regions of sufficient water. All of us need to understand the importance of water and problems related to lack of water in the future. We should not waste and contaminate useful water in our life and promote water saving and conservation among people.

Overall, the poster on Save water Save lives organized by the GrafixX Club serves as a shining example of how the arts can be a catalyst for change and a source of inspiration for individuals and communities to come together and work towards a cleaner, healthier, and more sustainable future.
