

Value Added Course
Session 2021-22
Certificate Course in Photography

Preface:

A Certification in Photography can provide additional skills and knowledge that can enhance a photographer's career. Photography certifications can serve as proof of competency in the use of digital and traditional cameras and are available for both general and commercial photographers and for those in specialty fields, such as forensic and ophthalmic photographers. Certification courses can cover a range of topics, including lighting, motion, equipment operation and maintenance, and the use of computer applications to enhance images. While a Bachelor's degree in Photography provides a strong foundation, a Certification in Photography can help photographers stand out in a competitive job market and demonstrate specialized knowledge and expertise in a particular area of photography.

Duration: 30 Hours

Timings: Batch 1st & 2nd
Monday, Wednesday & Friday
(1:00-2:00pm)
