Report: Description in (min 250 to max 800 words)*

A session on Group Discussion was organized by Training and Placement Cell, TIAS on 17.11.2023 for the students of BAJMC 1st Year, Program under the ambit of Capability Enhanced Program. The speaker was Mr. Karan Babbar, Assistant TPO, TIAS, as Resource Person and Dr. Nivedita, Head Training and Placement Cell, TIAS

The Resource person Mr. Karan Babbar stated Group Discussion helps participants to develop their problem-solving skills, including their ability to identify problems, to brainstorm solutions, and to evaluate the effectiveness of different solutions.

The topic for discussion was “Impact of Technology on Job Market” where students were allowed and given time to discuss on the topic. The students introduced the topic, then further discussed on the positives and negatives in relation to the topic.

The discussion started with stating the Impact of Technology on Job Market and how one can relate the importance of technology in the Job market. The discussion was further guided by Speaker on the technology and how the companies are using technology for making work easier and effective.

Some Advantages attached with positive attached with Impact of Technology on Job Market are:

- It creates entirely new job fields such as web developers, data scientists, or social media manager.

- It acts to increase productivity by automation and digital tools which can handle repetitive tasks, freeing up human workers to focus on more complex;

- Also technology demands a more skilled workforce. This can encourage investment in education and training programs.

Some Disadvantages attached with Impact of Technology on Job Market are:

- It creates unemployment and income inequality as automation is a major concern, as machines can increasingly perform tasks previously done by humans;

- It helps in skill gap as with the rapid pace of technological change can leave some workers behind if they lack the necessary skills to adapt;

- Also it leads to lack of human interaction as over-reliance on technology can decrease the need for face-to-face interaction in jobs.

So at last, Technology's impact on the job market is a double-edged sword, bringing both positive and negative changes, so the ideal approach lies is that technology to use it in an effective manner thereby leading to increasing productivity creating new opportunities.
