2nd session organized by ManveenChadha and KritiTiwari .They organized the team to build the team and responsibility quality between student.

3rd session to visit the AIC labs and center.

Atal Innovation Mission is mandated to promote a culture of innovation and entrepreneurship in our country. Through Atal Incubation Centers or AICs at universities, institutions and corporates, AIM is creating an ever-evolving ecosystem of start-ups and entrepreneurs.

Business incubators are institutions that support entrepreneurs in developing their businesses, especially in the initial stages. These are

 BCA-TIAS**

organizations geared towards speeding up the growth and success of start-ups and early-stage companies. Incubation is usually done by institutions that have experience in the business and technology world.

Incubation support includes providing technological facilities and advice, initial growth funds, network and linkages, co-working spaces, lab facilities, mentoring, and advisory support. They are often a good path to capital from angel investors, government organizations, economic-development coalitions, venture capitalists, and other investors.

Most of the incubators have potential capital to invest in growth startups or have links to potential funding sources. They provide access to compliance services from professionals such as accountants and lawyers; not to mention the invaluable mentoring and networking support available at the incubation center, through the staff and other entrepreneurs at the incubator.

AIM is a flagship initiative to promote the culture of innovation and entrepreneurship in India. It is an umbrella structure that has been mandated to promote innovation and revolutionize the entrepreneurial ecosystem in the country. It develops new policies and programmes for fostering innovation in different sectors of the economy and provides platform and collaboration opportunities to various stakeholders in the entrepreneurial space.

AIM intends to support the establishment of new greenfield incubation centers called Atal Incubation Centers (AICs) that would nurture innovative start-ups in their pursuit to become scalable and sustainable business enterprises.

AIM will support these AICs in creating world-class incubation facilities across the country with the state of the art physical infrastructure, in terms of capital equipment and operating facilities available to their incubate start-ups,
