Report Of Seminar Implementation Of Data Structure Using C Language On :

Tecnia Institute of Advanced Studies organized a Seminar on 25th October 2019 at BCA Deptt (PG Block, 4th Floor Room No:-1410), by Corporate Trainer Ms.Garima Saini, Career Bandhu (Delhi) for BCA 1st and MCA 3rd & 5thSem. The seminar divided into module and sub modules are:

SEMINAR CONTENT OF IMPLEMENTATION OF DATA STRUCTURE USING C LANGUAGE

1) Introduction to Data Structure

- Data, algorithm
- Performance analysis
- Space complexity
- Time complexity
- Best case, average case, worst case
- Linear and non linear data structures

2) Tree

- Binary Tree properties, types & traversals
- BST (operations on BST)
- AVL Tree

3) Graph

- Graph Terminologies and Types
- Graph Representations
- Graph Traversals
- Spanning Tree and Minimum Cost Spanning Tree (MCST)

Data Structure

Data Structures in C are used to store data in an organised and efficient manner. The C Programming language has many data structures like an array, stack, queue, linked list, tree, etc. A programmer selects an appropriate data structure and uses it according to their convenience.

Importance of Data Structure?

Data Structure is a process through which we can collect and organize data in the best way as well as perform operations on that in the most effective way. If we have a good understanding of data structures then we are specialized in organizing and storing data. Data structure is designed to organize data to suit a specific purpose so we can access and perform operations with in appropriate ways.

Types of Data Structure?

There are mainly two types of data structure:

- a.) Primitive Data Structures.
- b.) Abstract Data Structure

Primitive Data Structures: Primitive data types like integer, float, boolean & char etc. Concept to handling these types of data types in an efficient way known as Primitive Data Structures.

Abstract Data Structure: We have also complex type of data types like linked list, tree, graph, stack & queue etc. Concept to handling complex, connected and large amount of data in an appropriate way known as Abstract Data Structure.

There are two types of Abstract Data Structures:

- **Stacks:** It is a simple data structure that allows adding and removing elements in a particular order. Every time an element is added, it goes on the top of the stack, the only element that can be removed is the element that was at the top of the stack, just like a pile of objects.
- **Queue:** Queue is also an abstract data type or a linear data structure, in which the first element is inserted from one end called REAR(also called tail), and the deletion of existing element takes place from the other end called as FRONT(also called head). This makes queue as FIFO data structure, which means that element inserted first will also be removed first. The process to add an element into queue is called Enqueue and the process of removal of an element from queue is called Dequeue.

Learning Outcomes:

The students have learnt:-

1. Data structure.
2. Various types of Data structure
3. Implementation of Data Structure Using C Language
4. Performance analysis and Space complexity, Time complexity
5. Best case, Average case, Worst case

Nodal Officer	: Dr. Ruchi Srivastava
Convener-Incharge	: Mr. Inderpreet Singh
Student Beneficiary	: 64
Participation	: BBA, BJMC, BCA, MBA
Date	: 05/03/2022
Time	: 12:00 PM onwards
Platform	: Online
Resouce Person	: Mr. Rahul Garg, Chief Architect EICT Academy, IIT Kanpur and Director Prutor.ai

OBJECTIVES OF THE EVENT

1. To provide an opportunities to the students to understand the stress related to real life
2. To help students to deal with different levels of stress in their life
3. To develop the interests of the students for the activities that helps to remove the stress

REPORT

This activity has been organized by the Fit India Youth Club of Tecnia Institute of Advanced Studies on 05.03.2022. The student development program was organized to address the students about the stress that they deal with day to day basis. In this program, resource person discussed about the various layers of stress that students face in their real life and its practical solution which helps to reduce the stress of examination, career etc. All the participants enjoyed this event and were glad that these types of events were organised in the institution where they can learn something and grow themselves. The student development program helps the students much more than in the physical aspects alone. It builds character, develops strategic thinking, analytical thinking, leadership skills, goal setting and risk taking and the activities that can help to remove the stress.

All the students were motivated to devote time in this student development program. The main aim was to provide emotional concern for the students in Pandemic to build their mental health and to create awareness through this event.

OBJECTIVE:

- To make students understand the importance of interview.
- To make students understand the process on interview
- To make students understand how to prepare for interview.
- To make students understand the how to appear in the interview
- To make students understand the dos and don'ts of face to face and virtual interview.
- To enhance the confidence of the students.

REPORT:

A seminar was organized on 30.05.2022 by Training and Placement Cell under the ambit of Capability Enhancement Scheme on the topic, Interview Skill. The resource speaker for the webinar was Mr. Anil Singh Bhadoria, Senior Regional Head T.I.M.E Education, The seminar was attendant by 108 students from 1st Year BA(JMC) programme. The Speaker discussed about importance of interview in selection process for job and higher studies. He described that while interviewing especially for job the interviewer asks the questions on skills due to several reasons, like suitability for their role, strengths and weaknesses and to determine the employability to find the candidate who has the right mix of personal, fundamental and team work skills along with competencies. He described that skills the candidates should exhibit in an interview are communication skill, business acumen, collaboration or team work, adaptability, problem solving, positivity, skills of organization, leadership, negotiations, perseverance, confidence, self-motivated, ability to work under pressure, IT skills. He described the process of interview and of the candidate should prepare for it. He said that one should Research the Organization, Prepare and Practice the Answers, polish the image, stay calm and during an interview make a right impression, answer the right questions, get right tone, pay attention to body language, give right answer, not to falsify the information, sell the strength and skills, not to speak bad about past employer, not to speak over the interviewer and always ask few questions about the job and companies. He also briefed the interview process on digital

platform and suggested do's and don'ts of virtual interview. The one hour session was well coordinated and well received by the students.

LEARNING OUTCOME:

- The students understood the importance of interview.
- The students understood the process on interview
- The students understood how to prepare for interview.
- The students understood the how to appear in the interview
- The students understood the dos and don'ts of face to face and virtual interview.
- The students' confidence was enhanced.

Don't be over confident

- Attitude plays a key role in your interview success. There is a fine balance between confidence, professionalism and modesty.
- Even if you're putting on a performance to demonstrate your ability, overconfidence is as bad, if not worse, as being too reserved.
