External Expert / Internal Expert	NA

  
 Programme Officer, NSS (SFU)  
 Technia Institute of Advanced Studies  
 Madhuban Chowk, Rohini, Delhi - 85

Date*	07-03-2024
Time*	11:00AM – 12:00 AM
Venue	TIAS, PG Building, Room No. - 1109
Poster/Flyer/Notice*	
Social media link (promoting in any one Facebook/Instagram/Twitter is mandatory)	
No. of Students* (only no. to be written, list in excel or word should be maintain at department level as proof for any further requirement)	28
No. of Faculty* (only no. to be written, list in excel or word should be maintained at department level as proof for any further requirement)	01
No. of External Participants (students + faculty) [write NA if not applicable]	NA

**#InspireInclusion Campaign:** The International Women's Day website promoted the theme #InspireInclusion, encouraging individuals and organizations to champion a more inclusive world for women. They provided free toolkits and resources to help plan impactful events.

**Light Up the World:** A global initiative encouraged landmarks and buildings to be illuminated in purple and teal, the official colors of International Women's Day, to raise awareness and show solidarity.

**Local Events:** Countless local events were held around the world, including conferences, workshops, marches, and award ceremonies. These events celebrated women's achievements, addressed gender-specific challenges, and promoted action towards a more equitable future.

Report: Description in (min 250 to max 800 words) \*

International Women's Day, held on March 8th, 2024, was a global day of recognition for the social, economic, cultural, and political achievements of women. This year's theme, "Invest in Women: Accelerate Progress," highlighted the critical role women play in building a better future and the urgent need to address the financial gap hindering gender equality efforts.

**UN's Call to Action**

The United Nations led the charge with the theme "Invest in Women: Accelerate Progress." They emphasized that achieving gender equality is essential for a healthy planet, prosperous economies, and a just society. They highlighted the staggering \$360 billion annual deficit in funding for gender equality initiatives and urged increased investment to bridge this gap. The UN held a virtual commemoration event on March 8th, featuring inspiring speakers and discussions on accelerating progress towards gender equality.

**Global Recognition and Celebrations**

International Women's Day was celebrated worldwide with a multitude of events and initiatives. Here are some key highlights:

# DIAN FOSSEY

Dian Fossey was an American Zoologist born in 1912. She undertook extensive study of gorilla groups over a period of 18 years. She campaigned fiercely to protect gorillas in the wild and worked hard for conservation.

In her career Fossey had many of her study gorillas killed by poachers, one of which was killed whilst protecting its group, and was decapitated and his hands cut off for an ash tray for the price of \$20. Fossey began to fight heavily against the poachers, removing traps soon after they were laid, holding their cattle as ransom and capturing and humiliating poachers.

Fossey was found murdered in the bedroom of her cabin in 1985. She had been killed by a machete that she had confiscated from a poacher years earlier and hung as a decoration on her wall.

# ELIZABETH ANDERSON

Elizabeth Anderson was born in 1836 in London. In 1860 after being taught at home and private school, she decided she wanted to become a doctor. This was unheard of for a woman to do at the time and something many people would have thought of as offensive.

She was refused as a student by all medical schools and had to receive private tuition by practicing doctors in secret. Once she felt confident enough to take the examinations to qualify as a doctor, she was refused entry to any examinations.

In 1865 she was finally allowed to have her name on the medical register as a practicing physician.

# IMPORTANT WOMEN'S IN SCIENCE

## Women Sacrifice

Women have sacrificed a lot for science just as men have done. Often women have been seen in the past as not belonging in science as they were thought to have a more home-maker job to do.

Unfortunately for a lot of women, they were just never seen as being equal or up to the challenge of being in good science or even just many people think of being a scientist as a dangerous job, but really science should be thought of as fun and for trying without trying to know what the world will be like or not beyond.

The following slides show examples of women in science and examples of their contributions to making our lives better and more informed.

# KALPANA CHAWLA

Kalpana Chawla was born in 1961 in India. She studied Engineering and later specialised in Aeronautical engineering.

Kalpana became an astronaut in 1995 and in her career travelled the equivalent of 252 orbits of the earth.

Kalpana died in the Space Shuttle Columbia disaster which occurred on February 1 2003, when the space shuttle disintegrated over Texas during re-entry into the earth's atmosphere, with the loss of all seven crew members.

Since then she was awarded the Congressional Space Medal of Honour, the NASA Space Flight Medal and the NASA Distinguished Service Medal.

**#InspireInclusion Campaign:** The International Women's Day website promoted the theme #InspireInclusion, encouraging individuals and organizations to champion a more inclusive world for women. They provided free toolkits and resources to help plan impactful events.

**Light Up the World:** A global initiative encouraged landmarks and buildings to be illuminated in purple and teal, the official colors of International Women's Day, to raise awareness and show solidarity.

**Local Events:** Countless local events were held around the world, including conferences, workshops, marches, and award ceremonies. These events celebrated women's achievements, addressed gender-specific challenges, and promoted action towards a more equitable future.
